

2021 Springfield Youth Risk Behavior Survey of 10th & 12th Grade Students- Frequency Tables

Number of participants: 1,229

Estimated participation rate- 10th grade: 41%

Estimated participation rate- 12th grade: 30%

Background

The Springfield Youth Health Survey (YHS) was administered to students in the Springfield Public Schools as part of the Springfield Youth Health Survey Initiative. The survey was administered by the Public Health Institute of Western Massachusetts in collaboration with initiative partners, who are involved with planning and implementing the survey. These partners, referred to as the Planning Team, include representatives from:

- Gándara Center
- Martin Luther King Jr. Family Services
- Public Health Institute of Western MA
- Springfield Department of Health and Human Services
- Springfield Public Schools
- Mass Gaming Commission

2021 Funders included:

- Mass Gaming Commission
- Baystate Health

Methods

Survey Design and Administration

The survey consisted of a set of core questions and two modules. The survey was administered to all 10th and 12th grade students with 1,229 completing the survey. The participation rate was estimated to be 41% and 30% for 10th and 12th grade, respectively, using school enrollment to estimate total potential number of students who could complete the survey. All students completed the core questions and were randomly assigned to complete one of the two modules (see Table).

Randomized Modules	2: In what grade are you in?			
	10th grade	12th grade	Grade unknown	Total
Module 1	385	252	3	640
	52.10	51.85	75.00	52.00
Module 2	354	234	1	589
	47.90	48.15	25.00	48.00
Total	739	486	4	1229
	100.00	100.00	100.00	100.00

First row has frequencies and second row has column percentages

The YRBS was selected for use in Springfield because it is administered biannually by the Massachusetts Departments of Public Health (MDPH) and Elementary and Secondary Education (MDESE) to Massachusetts’ public school students to develop MA-wide prevalence estimates. The YRBS is conducted in Massachusetts as part of a national effort organized by the U. S. Centers for Disease Control and Prevention (CDC). The YRBS was developed to assess health behaviors that contribute substantially to the leading causes of death, disability, and social problems among youth and adults in the United States, including: behaviors that contribute to unintentional injuries and violence; sexual behaviors related to unintended pregnancy and sexually transmitted infections, including HIV infection; alcohol and other drug use; tobacco use; unhealthy dietary behaviors; inadequate physical activity. The YRBS also monitors the prevalence of obesity and asthma and other health-related behaviors.

The survey was administered in March (3/22/21-3/31/21) to 10th and 12th grade students enrolled in Springfield Public Schools. Students took the survey online during school hours using Alchemer (formerly known as Survey Gizmo). The schools had the discretion to determine when to administer the survey within a given time frame. Some schools chose to administer the survey on a single day and others chose to administer over multiple days. Two schools (Central and Sci-Tech) did additional surveying during the first two weeks of April.

A total of 1,229 10th and 12th grade students completed the survey. Guardians were able to opt out through a passive consent process. Students also had the ability to opt out of the survey on the day of administration. Some students were absent during these surveying periods which may bias the results if these students are significantly different from their peers.

Data Cleaning

The following data cleaning procedures were implemented:

- Removed grades other than 10th and 12th grade (n=96), with the exception of those with missing school grade data. There were 4 respondents who skipped the question about what grade they were in. Their responses were kept; however, they only show up in the “total” column which combines the grades.
- Dropped surveys that were blank or less than 1% complete (n=8)

The included responses have not been evaluated for logical consistency. Logical consistency means that responses to related questions such as to drinking behaviors match or make sense logically. For example, if a student reported never drinking in the last 30 days, they should have also reported that they have never driven under the influence of alcohol in the last 30 days. Results presented are based on how the students responded and may include inconsistent reporting.

Notes on Interpreting the Data

- **Denominators for Questions with Skip Logic:** Some questions used skip logic. This means that students were only asked some questions depending on how they responded to a previous question. If there was skip logic, the total number of respondents may be different because only some students got that question. Where applicable, the denominators are explicitly stated and should be interpreted accordingly.
- **Missing Data:** Not all students answered all questions so total number of respondents may vary for each question. In addition, some students were absent during the surveying period which may bias the results if these students are systematically different from their peers.
- **Small Numbers:** For some questions, there are few respondents for a given response category. Caution should be exercised when interpreting data based on small numbers.

How to read these tables

Two-way tables compare how students responded across two questions. In our tables, the first row (bolded in the example below) shows the number (count) of students that chose the same answer options for each question. The percentages (italicized) beneath show the percent of students in each grade that chose the same response options. They are referred to as column percentages. Column percentages will always sum to 100% and should be interpreted within each grade (column).

	2: What grade are you in?		
	10th grade	12th grade	Total
What is your favorite fruit?			
Apples	40 <i>40.00</i>	25 <i>50.00</i>	65 <i>43.33</i>
Oranges	60 <i>60.00</i>	25 <i>50.00</i>	85 <i>56.67</i>
Total	100 <i>100.00</i>	50 <i>100.00</i>	150 <i>100.00</i>

This sample table shows how many students in each grade chose apples or oranges as their favorite fruit. You would interpret this table by looking down each column (grade category). For example, the table tells us 40 out of 100 10th graders chose apples (40%) and 25 out of 50 12th graders (50%) chose apples. The third column adds the counts (bolded) from the first two columns so that we can understand overall how many 10th and 12th grade students like each type of fruit and the percentage (italicized) is based on the total number of students that responded to the question (150 students).

Demographics

1: How old are you?	2: What grade are you in?		
	10th grade	12th grade	Total
14 years old or younger	3	2	5
	0.41	0.41	0.41
15 years old	249	0	249
	33.69	0.00	20.33
16 years old	404	2	406
	54.67	0.41	33.14
17 years old	73	198	271
	9.88	40.74	22.12
18 years old or older	10	284	294
	1.35	58.44	24.00
Total	739	486	1225
	100.00	100.00	100.00

First row has *frequencies* and second row has *column percentages*

3. What is your race/ethnicity? (Mutually Exclusive Categories)	2: What grade are you in?		
	10th grade	12th grade	Total
American Indian or Alaska Native Non-Hispanic	2	2	4
	0.27	0.41	0.33
Asian Non-Hispanic	29	16	45
	3.95	3.31	3.69
Black Non-Hispanic	148	115	263
	20.16	23.76	21.59
Hispanic/Latino	503	310	813
	68.53	64.05	66.75
White Non-Hispanic	52	41	93
	7.08	8.47	7.64
Total	734	484	1218
	100.00	100.00	100.00

First row has *frequencies* and second row has *column percentages*

Note: Respondents could select more than one response; however, the categories depicted here are mutually exclusive. For example, if student indicated Hispanic/Latino, whether alone or in combination with any race, the student was categorized as Hispanic/Latino. For the remaining race categories, participants were re-coded in the following order depending on their selections: Black/African American, Asian, American Indian/ Alaska Native, Native Hawaiian or other Pacific Islander, and White.

4: What is your sex?	2: What grade are you in?		
	10th grade	12th grade	Total
Female	401	265	666
